

Goals for September 3 - 14 (two weeks)

(keep this sheet in or your organizer at all times)

Big Idea: Learn how life has changed over time.

Goals:

- Discover how living things have adaptations that help them survive
- Understand that the environment is an important factor in selecting which species survive

Vocabulary:

1. Species
2. evolution
3. Natural selection
4. variation
5. adaptation
6. embryo
7. vestigial structures
8. primates
9. Hominids

Concepts you should know:

- Theory of Evolution
- How natural selection determines which species survives

Important Dates

Test on September 13 or 14 (depending on class schedule)

Reference pages 153-176
