

## Study Sheet

### **Mollusks and Arthropods**

**Test Thursday and Friday December 6-7**

#### **Mollusks**

What are the 3 classes of mollusks, name an example from each.

Know the following words:

Open circulatory system

Closed circulatory system

Explain why mollusks can be important to people.

#### **Arthropods**

Name the four classes (groups) of arthropods and name 2 examples for each.

Explain the body structure for each class of arthropods. A drawing would do fine.

Describe the difference between old world and new world tarantulas.

Describe how tarantula fangs are different from spiders found around your house.

Describe how arthropods are important to people.

Know these words:

Head

Thorax

Abdomen

Metamorphosis

Know the class specimens in your journal
